Tarea 4. Usando el comando scanf.

Yo voy a sumar dos números dados.

The screenshot shows the Dev-C++ IDE with a C program in the main.c file. The program uses scanf to read four integers (a, b, c, d) and calculates their sum (e = a + b + c + d). A console window shows the input values and the resulting sum.

```
#include <stdio.h>
#include <conio.h>
#include <math.h>
int a,b,c,d,e,i,r1,r2;
int main(int argc, char *argv[])
{
    printf("Dame a:\n");
    scanf("%d", &a);
    printf("Dame b:\n");
    scanf("%d", &b);
    printf("Dame c:\n");
    scanf("%d", &c);
    printf("Dame d:\n");
    scanf("%d", &d);
    e=a+b+c+d;
    printf("%d+%d+%d+%d=%d\n", a, b, c, d, e);
    getch();
    return 0;
}
```

Console Output:

```
Dame a:
23
Dame b:
23
Dame c:
45
Dame d:
3
23+23+45+3=94
```
